

With more than a \$17 billion budget surplus to work with, Governor Walz's budget provides little or nothing that solves

Minnesota's workforce crisis in senior care.

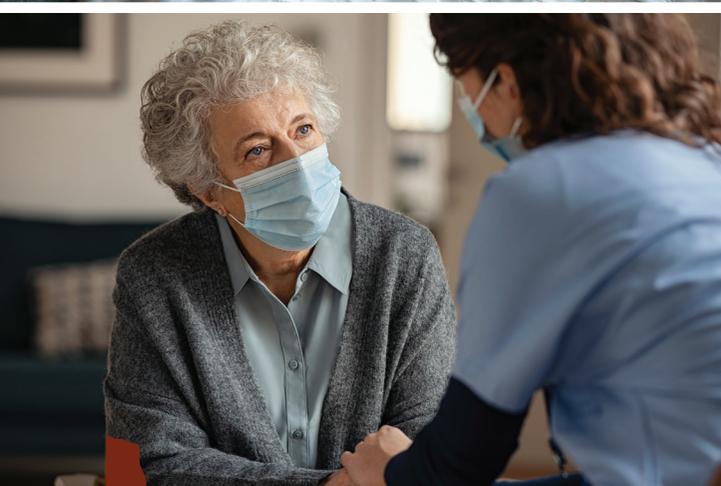

Seniors turned away from care facilities –
11,000 in just one month

Minnesota hospitals can't discharge seniors to care settings – **there is nowhere to go!**
Seniors can't receive the care they need

20,000 caregiver positions that haven't been filled due to **lack of state funding**

In the next five years, there will be 50,000 more Minnesotans who are at least 80 years old – these are the seniors most in **need of ongoing services and support**

Is this what the “One Minnesota” promise meant?
Going backwards by ignoring seniors?

Tim Walz's legacy will include fewer nursing homes and fewer care options for seniors in their communities. Even as our senior population continues to grow.

Contact your legislators today and urge them to **support funding for the care our seniors need.**
